

Product Manager

NOVATO, MARIN COUNTY, CALIFORNIA
FULL-TIME

One Legal is one of the most trusted names in legal technology in the United States and we're changing the way law firms, businesses, and individuals get documents into courts.

As an integral member of our Product team, you will be focused on improving the overall user experience. You will design new features and products that help attorneys and their teams achieve their goals with ease. You will work closely with our talented and highly agile engineering and marketing teams and will get to work with company leadership to drive new product initiatives

ABOUT YOU:

We're looking for a hands-on Product Manager who has spent at least 2 years working in a product management position with a focus on improving the user experience

You must be highly analytical, pragmatic, and ask lots of great questions. Ideally, you're someone who relishes the opportunity to drive significant change by demonstrating business cases that are supported by hard data and serious research.

You must have a proven ability to handle ambiguity, work cross-functionally, and collaborate on projects with other teams — both internally and externally.

YOU WILL:

- Engage with customers to gather feedback to inform product direction.
- Research and understand our marketplace to ensure that One Legal stays ahead of the competition.
- Prioritize projects based on real data and insights, and choose the projects that will have the greatest impact on the customer experience.

- Translate your analysis into product and features specs, wireframes, and mock-ups and work with designers and engineers to turn specs into shippable products.
- Work cross-functionally with the business, especially with Engineering, Marketing, Sales, and Customer Support to set overall release cycles and to ensure that new products and feature launches align with business and customer requirements.
- Own the roadmap for delivery of new products and product features, and be completely accountable for what is pushed to production.

YOU SHOULD HAVE:

At One Legal we consider every candidate on his or her individual merits. However, possession of some or all of the following skills and experiences will help to significantly differentiate you from the field.

- 2+ years experience as a product manager at a tech company
- Education or experience that has provided you with knowledge of a professional services industry (bonus for a J.D. and/or work experience within a law firm).
- Experience creating flowcharts, wireframes, and mock-ups.
- Familiarity with the Agile project management methodology, and ideally, at least, two years experience working within it.

BENEFITS:

We offer a great compensation package, with paid vacation, flexible working options (including quarterly remote “workcations”), a fun and casual work environment, a competitive benefits plan, and the opportunity to be part of a team that is shaping the future of legal technology.
