

Senior .Net API Software Engineer

NOVATO or OAKLAND, CA
FULL-TIME

One Legal is a technology driven company that is transforming how legal professionals access legal support services. We're building online tools that help simplify the administration of legal practice and, in the process, transforming the industry.

It's our vision to be the most trusted technology provider for legal support services in the United States.

ABOUT YOU:

We are looking for dynamic Software Engineers to help us to become a leader in our industry. We're looking for people that want to be engineers, not just developers, and enjoy solving hard problems. Your technology stack includes Microsoft SQL Server, Entity Framework, ASP.Net MVC/Web API & RabbitMQ, etc. and you're willing to quickly expand to other technologies. You can work with little direction, are able to lead teams and use technology to find the best solutions to move forward in our technology transition. We have offices in both Novato and Oakland.

YOU WILL:

- Work with modern design patterns and methodologies
- Fix problems – sometimes yours, sometimes not – demonstrating an honest drive to make things better
- Own your work
- Work with outside vendors, contractors and offshore development
- Heavy concentration of API's both creating and consuming
- 10+ years of experience developing applications in all major areas of .Net
- Advanced Web Services such as WCF, Web API, SOAP, RESTful interfaces, etc.
- Front-end experience is a plus, but not required
- Ability to thrive in a team environment, or as an individual contributor on a project with minimal direction

- Work on projects both as individual contributor and team member

WHAT WE WOULD LIKE TO SEE:

At One Legal we consider every candidate on his or her individual merits. However, possession of the following will help to differentiate you from the field.

- Strong C# experience with a history of SOAP and/or ReSTful API development
- Experience with modern development methodologies – Agile, CI, CD, etc.
- Experience with Microsoft Azure Cloud, Object Storage and development tools
- ERP, CRM, other large-scale systems (NetSuite, Salesforce, SAP, MS Dynamics) a plus but not required
- Big data, which could mean many things, but large data sets, NoSQL, machine learning, etc. a plus but not required

BENEFITS:

We offer a great compensation package, with paid vacation and sick time, flexible working options, a fun and casual work environment, a competitive benefits plan, and the opportunity to be part of a team that is shaping the future of legal technology.

As a bonus, you'll be working out of our headquarters in beautiful Marin County, just 25 traffic-free minutes north of the Golden Gate Bridge or in Oakland.

HOW TO APPLY:

Send a resume, cover letter, and link to your LinkedIn profile to resumes@onelegal.com.
